TECHNICAL SKILLS

Back End Development: Java, SpringBoot, OOPS, DSA

Databases: MySQL, DBeaver

Version Control: Git, BitBucket

Collaboration Project Management: Azure DevOps, Jira

Developer Tools and IDEs: IntelliJ IDEA, VS Code, Android Studio, Eclipse, Cursor AI

Monitoring and Logging: Kibana

Other Skills: HTML, CSS, Flutter

EXPERIENCE

Paytm

June 2025(Present)

Software Engineer Intern

- About the role- Built WPS refund module: validated .csv files, converted to .txt, parsed data, maintained upload history, and enabled filtered downloads.
- Implemented offline online refund flows with RRN validation, duplicate checks, AML/QCB rules, and async auto-approval for reversals.
- Added enterprise-grade validation patterns for file formats, request payloads, and ID ranges using repositories and custom utility classes.
- Integrated IBAN generation, customer status checks, and manual WPS submission with external partners (M2P) using WebClient.
- Worked with Git/Bitbucket, Azure DevOps, Jira, Kibana, Postman, DBeaver, IntelliJ IDEA, Cursor AI for end-to-end development monitoring.

PROJECTS

iPay Qatar(Paytm Project) 🗄 | Java, Spring Boot, MySQL, REST APIs, Azure DevOps, Git/Bitbucket.

- Contributed to a digital payments platform supporting user/merchant onboarding, P2P/P2M transfers, bank transfers, and utility bill payments.
- Delivered multiple enhancements and change requests, including transaction validation, refund/reversal handling, and notification improvements.
- Developed modules for cashback/referrals, multi-channel notifications (SMS, Email, In-App), and transaction reporting.

Inventory Management System 🗄 | Spring Boot, Spring Data Jpa, Spring Security, Junit, API

- An IMS (Inventory Management System) is a software system that helps businesses manage product stock—tracking availability, sold items, and restocking needs..
- RESTful APIs for product CRUD operations.
- MySQL database integration .
- Spring Security for Authentication .
- Tested with JUnit for Code reliability .
